Functional Features Included in the Solution

Phase 5 | Feature inventory

Count and categories

The following inventory groups implemented capabilities into 12 user-visible or supporting feature areas. The count is an inventory convention, not a formal complexity or quality score.

Feature inventory

#	Feature	Evidence
1	Account registration	POST /auth/register and Account page.
2	Account login and logout	POST /auth/login; session handling in frontend.
3	Current profile	GET /auth/me.
4	Preference-based itinerary request	POST /trips/plan and trip form.
5	Structured itinerary presentation	ItineraryDisplay and TripView.
6	Save generated itinerary	POST /trips/create.
7	List saved trips	GET /trips and My Trips page.
8	Trip detail retrieval	GET /trips/{id} and detail route.
9	Edit saved trip	PATCH /trips/{id} and editor UI.
10	Delete saved trip	DELETE /trips/{id}.
11	Regenerate and save one day	POST /trips/regenerate-day followed by itinerary update.
12	Copy/share/download summary	Browser copy/share actions and Markdown download.

Supporting platform capabilities

- Supabase persistence with in-memory development fallback.
- Groq/Ollama generation with local fallback.
- Authenticated route gating and per-user browser cache.
- Health endpoint and deployment configuration.

Not counted as implemented user features

Maps, booking, live travel feeds, collaborative editing, anonymous public sharing, and a Hugging Face generation adapter are not counted because these flows were not found in the inspected implementation.

Prepared from the current project source and configuration. Product assumptions and proposed work are labeled; no user research, test result, or deployment result is implied unless explicitly stated.
