Demonstration of Proposed Features

Phase 8 | Feature-to-demo evidence

Feature walkthrough

Feature	Demonstration action	Evidence to point out
Account access	Sign in or register.	Profile and authenticated navigation.
Trip personalization	Fill trip form.	Destination, dates, group size, budget, style, pace, interests, dietary needs.
AI-assisted planning	Request a plan.	Day summaries and structured activities; explain provider/fallback configuration.
Trip persistence	Save and open My Trips.	Trip appears in library and detail route.
Trip maintenance	Update fields and regenerate a day.	Changed trip data and updated selected day.
Export and sharing	Copy link/summary; download Markdown.	Portable text file and authenticated detail URL.

Narration cues

- The model output is parsed into defined itinerary schemas.
- A local generator is available when remote generation cannot be used.
- Supabase is the durable persistence option; memory mode resets on restart.
- The shared trip route remains behind authentication.
- Traveler verification is needed for prices, hours, safety, and availability.

Avoid overclaiming

Do not describe suggestions as reservations, live-verified prices, or guaranteed accessible routes. Do not claim anonymous public sharing or production readiness without confirming those behaviors in the deployed system.

Prepared from the current project source and configuration. Product assumptions and proposed work are labeled; no user research, test result, or deployment result is implied unless explicitly stated.
