Project Demo Planning

Phase 8 | Reproducible walkthrough plan

Demo goal and setup

Show the user journey from sign-in through itinerary generation, saving, refinement, and export. Before presenting, confirm backend health, frontend reachability, provider configuration or local fallback, database schema, and a dedicated demo account.

Run of show

Time	Step	Outcome
0:00-0:30	Introduce the product and boundary.	Set expectation: itinerary suggestions, not bookings.
0:30-1:15	Sign in or register.	Authenticated app opens.
1:15-2:15	Enter trip preferences.	Show meaningful inputs.
2:15-3:15	Generate and inspect itinerary.	Explain days, activities, and fallback.
3:15-4:15	Save and reopen from My Trips.	Show persistence and trip detail.
4:15-5:15	Edit details and regenerate one day.	Show refinement saved to trip.
5:15-6:00	Copy/share/download.	Show portable output and explain auth boundary.

Demo data

- Choose a familiar destination and valid date range.
- Use a 3-day plan with a moderate budget and a few interests.
- Use a non-sensitive dietary note only if useful to demonstrate personalization.
- Prepare a sample itinerary locally in case the provider is slow.

Success criteria

- The presenter can explain inputs and show a structured plan.
- The plan is saved and reopened from the trip list.
- At least one edit or day regeneration is persisted.
- The presenter explains Supabase persistence and local fallback accurately.

Prepared from the current project source and configuration. Product assumptions and proposed work are labeled; no user research, test result, or deployment result is implied unless explicitly stated.
