Team Involvement in Demonstration

Phase 8 | Presenter roles and participation record

Participation record

The repository inspected for this report does not provide a verified team roster, role allocation, or individual contribution record. This template describes demo responsibilities without assigning people or claiming specific historical contributions.

Suggested responsibilities

Role	Demo responsibility
Presenter	Introduce the problem, guide the user workflow, and state product limits.
Technical explainer	Describe frontend/API/database/AI flow and answer architecture questions.
Operator	Monitor backend health and provider/database status; handle recovery if needed.
Recorder or evaluator	Capture feedback and note follow-up issues, with consent where applicable.

Participation checklist

- Agree on who speaks for each section before the demo.
- Rehearse handoffs and keep the walkthrough within the allotted time.
- Use a dedicated account and avoid displaying secret values.
- If only one person presents, combine roles and keep a fallback plan ready.
- Record actual contributors and responsibilities only after the project team confirms them.

Post-demo notes

After the presentation, record attendee questions, observed friction, and proposed follow-up actions. Separate direct feedback from the team's interpretation; do not present uncollected feedback as evidence.

Prepared from the current project source and configuration. Product assumptions and proposed work are labeled; no user research, test result, or deployment result is implied unless explicitly stated.
